

## UDEA

Problem	<p>Despite the increasing number of higher educational institutions and applicants each year, there have been no offers in the educational sector for high-quality international educational programs from institutions with a QS rating above 4 stars and those included in the top 1000 world rankings, such as QS, THE, and others, until today.</p>
Solution	<p>As a solution to the above problem, in 2022, the management of JSCB Agrobank decided to create a higher education institution - the University of Digital Economy and Agrotechnologies (UDEA), which would provide training for the most in-demand fields, taking into account the trends of digitization in the fields of economy, finance, and agribusiness.</p> <p>The goal of the university is to provide high-quality education to the youth of Uzbekistan and create opportunities for internationally recognized scientific research.</p>
Result	<p>As a result, JSCB Agrobank launched UDEA - the only university in Central Asia, offering international educational programmes in collaboration with Coventry University (UK).</p> <p>According to the QS World University Rankings, Coventry University (UK) offers international programs for more than 50,000 students in over 30 countries. The university has a 5-star rating from QS Stars University Ratings and is one of the top 20 universities in the UK.</p> <p>In 2023, JSCB Agrobank provided 200 fully-funded scholarships with stipends for Coventry University (UK) programmes at UDEA. Fully-funded scholarships include full contract fee coverage throughout the entire study period, as well as a monthly stipend payment.</p>
