

Identity concept

Each year the Cosmoscow fair selects a winning artist whose work forms the basis of the brand identity for the new season. Artist of 2023 is Artyom Filatov. While researching his works, we grabbed hold of the work "Everything Will Disappear" (2022), painted using green paint. Thanks to its properties, every time a folder containing a sheet of graphics is opened, the image is exposed to light and fades, shortening the life of the work with each viewing.

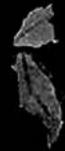

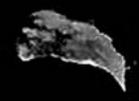

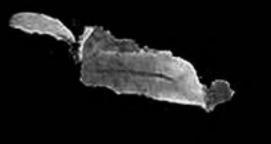

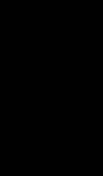

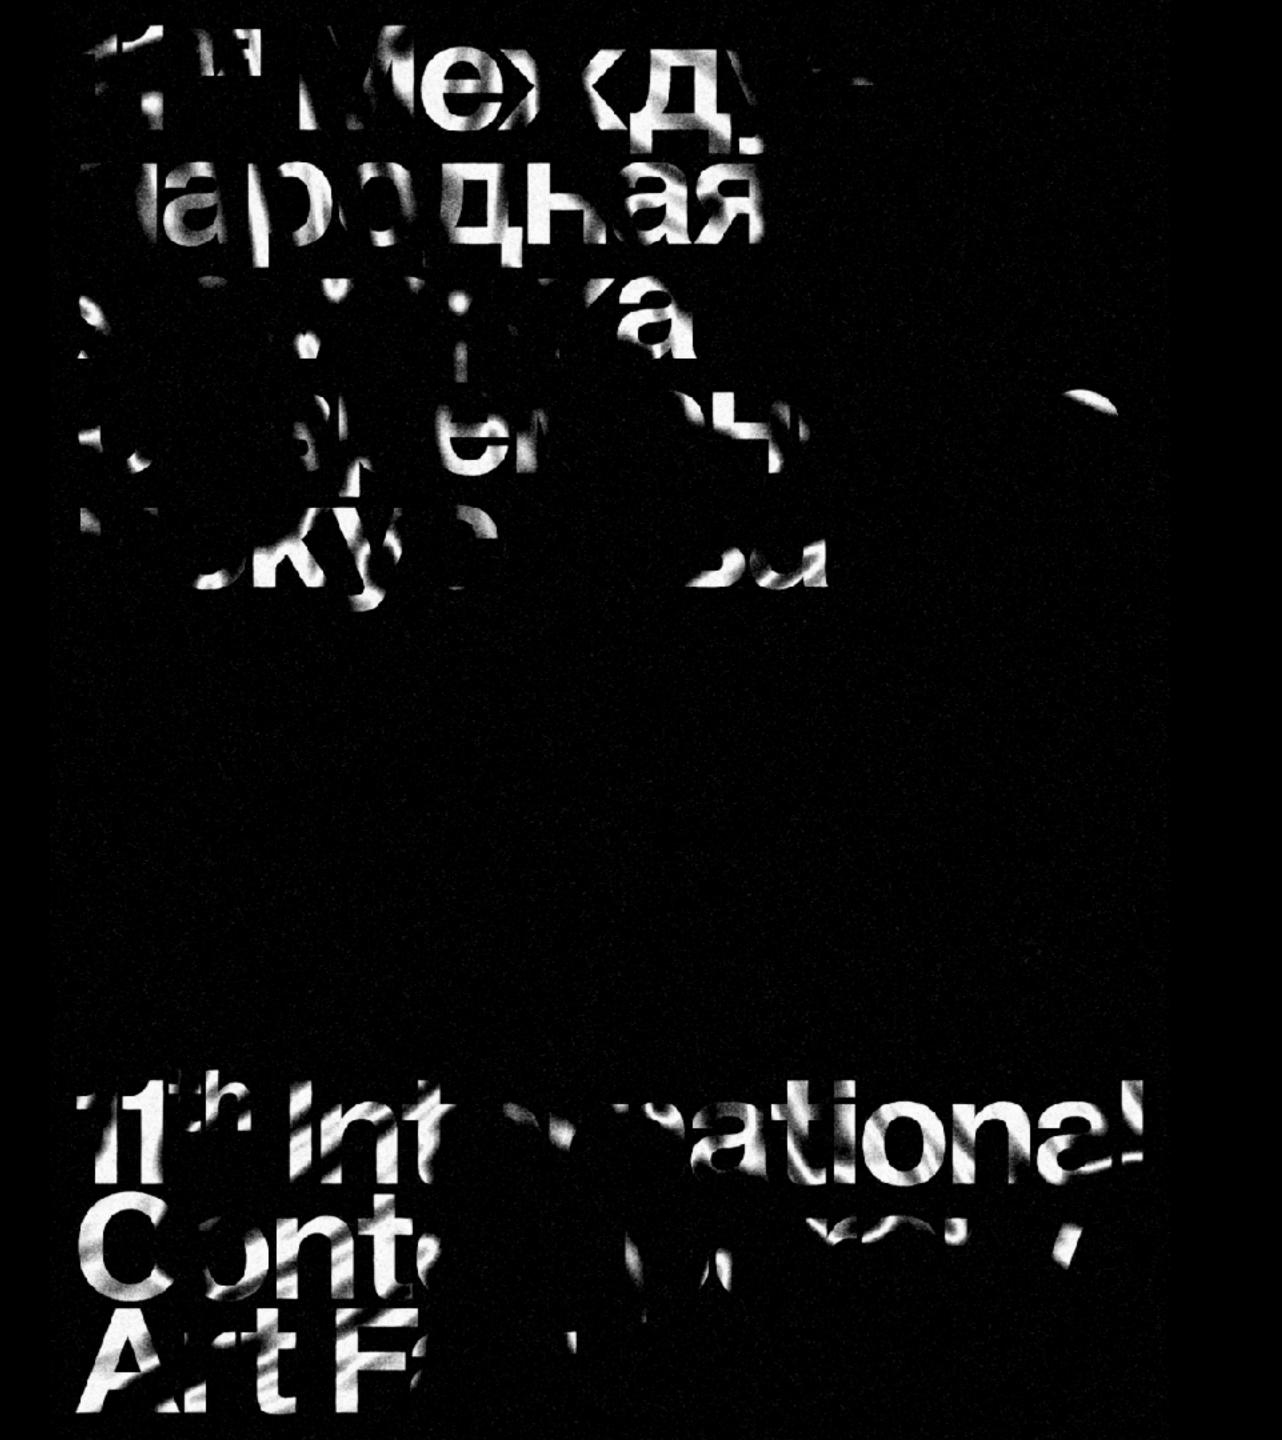

· · ·

Everything will disappear

We used a gradient 3D blur projection and color noise that blends into the typography and creates a blurred edge effect. In Filatov's works and other photographs used for identity media, there is a local or complete disappearance of typography. The color palette and various combinations of elements allow you to create original compositions for the visual media of the art fair.
